Amsterdam, Netherlands

8 years building guest and partner-facing mobile products at Booking.com: Room Selection, Rate Selection, Room Customiser, and Pulse. Design and research shipped across surfaces reaching **8M+ daily guest sessions** and **1.25M+ property partners**. Research-led, experimentation-driven, and focused on turning ambiguous problems into validated, measurable outcomes across iOS, Android, and Web.

EXPERIENCE

Booking.com · Product Designer, Mobile

2017 to 2025 · Netherlands

Partner-facing app: Pulse

- Sole designer on the AV Pulse team; redesigned the Mobile Availability Calendar for 1.25M+ partners, **tailoring the experience to 3 distinct partner personas**. Owned the project end-to-end, from design sprint and research through Beta launch.
- Increased **partner satisfaction from 65% to 71%**, grew bulk-edit usage by +10%, and achieved **75.7% Beta retention** across ~3,900 partners, with no negative impact on support tickets, bookings, or app stability.

Guest-facing app: Horizontal Comparison, Room Customiser

- Designed the Room Customisation Flow, replacing 234K daily unstructured requests with a structured preference system; proved its value via a block-out test (**removing it cost ~500 bookings/night**) and **grew cot and extra-bed requests by 50%**.
- Adapted and shipped Horizontal Comparison, a new way to let guest compare and select their rooms. Structured delivery into 3 phases (Foundation, MVP, future iterations) to **de-risk a complex, multi-team rollout**.
- Shipped Horizontal Comparison with a **+4.82% increase in best-rate bookings** and **+3,118 bookings per day**, with 75%+ of Android users scrolling horizontally, confirming the core discoverability hypothesis.

Globant · UX Designer

2015 to 2017 · Argentina

- Designed user flows, site maps, and responsive wireframes for clients including Google, J.P. Morgan, and Scholas.
- Built interaction specs and prototypes that closed the design-to-engineering handoff gap across client teams.

Educabilia · Graphic and Web Designer

Jan 2013 to June 2014 · Argentina

- Redesigned Educabilia.com.ar's UX and front-end, improving course discovery, sign-up conversion, and bounce rate.
